Quick Start

Set up Kintai and create your first schedule in under 10 minutes.

Step 1 — Create your store ☒

1. Log in as an administrator.
 2. Go to **Admin > Stores > + New Store**.
 3. Enter: **Name**, **Currency** (e.g. **EUR**), and **Timezone**.
 4. Save.
-

Step 2 — Define your shift types ☒☒

Shift types are reusable templates (e.g. "Morning", "Evening").

1. Go to **Admin > Shift Types > + New**.
 2. Name the type, choose a colour and default hours.
 3. Save.
-

Step 3 — Add your team ☒

1. Go to **Admin > Users > + New User**.
2. Enter the name, email, and a temporary password.
3. Then go to **Admin > Stores** and click on your store.
4. In the **Members** section, click **Add Member** and choose their role.

Important: creating a user is not enough — they must be linked to the store to have access.

Step 4 — Build the schedule ☒

1. Go to **Planning > Timeline**.
2. Click on a cell for an employee on a given date.
3. Choose the shift type and adjust the times if needed.
4. Save.

☒ Tip: drag and drop shifts to move them to a different day or assign them to a different employee.

Step 5 — Enable the timeclock ☒☒ (Optional)

Employees automatically see the **Timeclock** tab as soon as they are members of a store with the "Staff" or "Manager" role. No additional configuration is required.

Your store is up and running!

For more:

- Owner Guide — SMTP setup, payroll, audit log.
- Manager Guide — Shift bidding, reports, statistics.
- Employee Guide — Everything your staff needs to know.

Owner Guide

This guide is for Kintai's global administrator. As an owner, you have full access to all stores, users, and settings.

Other languages: Français | 日本語

Your role at a glance

You can	You cannot
Create, edit, and delete stores	Nothing — you have full access
Create and manage all users	—
Configure SMTP, Cron, payroll deductions	—
Generate payslips	—
View the full audit log	—

1. First Launch — Setup Checklist

Before your team can use Kintai, complete these steps **in order**:

- [] Create your first store
 - [] Create shift types (Morning, Evening, etc.)
 - [] Create employee accounts
 - [] Link each employee to their store with the correct role
 - [] (Optional) Configure email sending (SMTP)
 - [] (Optional) Enable automatic daily report closure (Cron)
-

2. Managing Stores

Create a store

1. Go to **Admin > Stores**.
2. Click **+ New Store**.
3. Fill in:
 - **Name**: the establishment's name.

- **Currency:** EUR, JPY, USD, etc. This symbol is displayed everywhere.
- **Timezone:** critical for notifications and automatic reports (e.g. Europe/Paris, Asia/Tokyo).

4. Click **Save**.

Configure a store

In the store list, click **Edit** next to the store. You will find several tabs:

"Break Rules" tab

Define automatic break deductions:

- Example: after **6 hours** of work → **30 minutes** deducted from payroll calculations.

"Daily Reports" tab

- **KPIs to track:** choose which metrics employees enter (Sales, Customers, Staff Cost, Losses).
- **Auto-validation:** enable and set a time (e.g. 23:55). If no report is validated before this time, Kintai validates it automatically.
- **Email recipients:** add addresses that receive the nightly PDF report.
- **Authorised employees:** restrict who can create a report (default: all store members).

"SMTP" tab

For Kintai to send emails (PDF reports, notifications):

- **Host:** your SMTP server (e.g. smtp.gmail.com).
- **Port:** 465 (SSL) or 587 (TLS).
- **Username / Password:** your SMTP credentials.
- **From address:** the address that appears on outgoing emails.
- Click **Test Connection** to verify the configuration before saving.

"Social Contributions" tab

Define deductions applied when calculating payslips:

- Each contribution has a **label** (e.g. "Health Insurance") and a **rate in %** (e.g. 13.0).
- These values can be overridden per employee if needed.

3. Managing Users

Create a user account

1. Go to **Admin > Users**.

2. Click **+ New User**.
3. Fill in:
 - **First / Last name** (or **Display name**).
 - **Email**: used for login and email notifications.
 - **Employee Code**: an alternative login method if the employee has no professional email address.
 - **Password**: communicate it securely to the employee. They can change it from their profile.
 - **Language**: the interface language for this user (**fr**, **en**, **ja**).
4. Click **Save**.

Important: creating a user does not give them access to a store. You must add them manually (see below).

Link a user to a store

1. Go to **Admin > Stores** and click the store name.
2. In the **Members** section, click **Add Member**.
3. Search for the employee by name or email.
4. Choose their **role** in this store:
 - **Staff**: views their schedule, clocks in/out, submits requests.
 - **Manager**: manages schedules, validates requests and reports.
 - **Admin**: full access to store settings.
5. Click **Add**.

One user can be a member of multiple stores with different roles in each.

Edit or deactivate an account

In **Admin > Users**, click the user's name:

- **Edit**: update their information, password, or hourly rate.
- **Deactivate**: the user can no longer log in, but their historical data is preserved.

4. Managing Shift Types

Shift types are your **reusable templates** (e.g. "Opening", "Closing", "Night shift").

1. Go to **Admin > Shift Types**.
2. Click **+ New Type**.
3. Fill in:

- **Name** (e.g. "Morning").
- **Colour**: for visual identification on the timeline.
- Default **start/end time** (editable when creating a shift).
- **Bonus rate** (optional): e.g. **+20%** for night shifts.

4. Click **Save**.

5. Payroll and Statistics

Set an employee's hourly rate

1. Go to **Admin > Users** and click the employee.
2. Open the **Hourly Rates** tab.
3. Click **+ Add Rate**:
 - **Amount**: in the store currency (e.g. **12.50**).
 - **Effective from**: the date from which this rate applies.
4. Save. Kintai always uses the rate in effect on the shift date when calculating wages.

Generate a payslip

1. Go to **Admin > Users** and click the employee.
2. Select the **Payslip** tab.
3. Choose the **period** (month / year).
4. Click **Generate**: Kintai calculates wages based on shifts, timeclock entries, and configured contributions.
5. Click **Download PDF** to get the payslip, ready to print or send.

Global performance report

Go to **Admin > Employee Statistics** to view, by period and store:

- Total hours worked.
- Staff cost.
- Profitability cross-referenced with daily report data.

6. Audit Log

Accessible via **Admin > Activity Log**, this immutable register records every action taken in the system:

- **Who** did what (creation, modification, deletion).
- **When** (precise timestamp).

- From which IP address.

Use the filters to search by user, action type, or date range.

7. Automation (Cron)

For automatic daily report closure to work, a scheduled task must call this URL **every hour**:

```
GET https://your-site.com/cron/auto-validate?token=YOUR_SECRET
```

The **token** is defined in your server settings. See the OVH Cron Guide for an example configuration on shared hosting.

Manager Guide

This guide is for store managers and administrators. As a manager, you manage scheduling, validate your team's requests, and monitor your store's performance.

Other languages: Français | 日本語

Your role at a glance

You can	You cannot
Create and edit schedules	Create new user accounts
Approve leave and shift swaps	Change global system settings
Correct missed clock-ins/outs	Access stores you do not manage
Validate daily reports	Generate payslips
View store statistics	Access the global audit log

1. Your Dashboard

On login, your dashboard shows the widgets you have selected. Click **Customise** to enable or disable:

- **Today's KPIs:** real-time sales and customer counts.
- **Active timeclocks:** who is currently at work.
- **Urgent requests:** pending leave, swaps, and shift applications awaiting your decision.

2. The Timeline — Managing Schedules

The Timeline is your main tool. Go to **Planning > Timeline**.

Create a shift

Quick method: click the cell for the employee and day you want. A window opens:

1. Choose the **Shift Type** (Morning, Evening, etc.) — times fill in automatically.
2. Adjust the **start** and **end** times if needed.
3. Add an optional **note** visible to the employee.
4. Click **Save**.

Edit or move a shift

- **Drag and drop:** grab a shift and drag it to another day or another employee. The change is instant.
- **Detailed edit:** click a shift to open its details and modify them (time, type, note).

Delete a shift

Click the shift, then the **Delete** icon (trash bin). A confirmation is required.

Resolve a scheduling conflict

If two shifts for the same employee overlap, an alert appears on the timeline. Go to **Planning > Conflicts** to view and resolve all overlaps.

Import a schedule from Excel

1. Download the Excel template from **Store Settings > Excel Settings**.
2. Fill it in with your schedule data.
3. In **Planning > Timeline**, click **Import**.
4. Kintai shows a **preview**: check the data row by row before confirming. Errors are highlighted in red.
5. Confirm the import.

3. Shift Bidding (Open Shifts)

Shift bidding lets you offer unassigned slots to your team and manage applications.

Post an open shift

1. Create a shift as normal (or edit an existing one).
2. In the shift form, check **"Post to Bidding"**.
3. Add an explanatory note if needed (e.g. "Urgent — please apply by Thursday").
4. Save. The shift appears in the list of available shifts for your employees.

Manage applications

1. Go to **Requests > Shift Bidding**.
2. You see the list of open shifts and the employees who have applied.
3. Check each candidate's availability and profile.
4. Click **Approve** next to the selected candidate.
5. The shift is automatically assigned to them, and other applicants receive a rejection notification.

4. Team Requests

Approve or refuse a leave request

1. Go to **Requests > Leave**.
2. Pending requests are shown with the relevant dates.
3. Check the schedule for those dates to make sure the absence is manageable.
4. Click **Approve** or **Refuse**.
5. The employee receives a notification immediately.

If you approve, the employee's shifts during that period are automatically deleted or marked as "Absent".

Approve or refuse a shift swap

1. Go to **Requests > Shift Swaps**.
2. Check the details: which employee is proposing which shift to which colleague, and what they receive in exchange.
3. Verify that both employees are available on their new dates.
4. Click **Approve** or **Refuse**.

5. Timeclock Management

See who is at work in real time

Go to **Timeclock > Active Timeclocks**. You can see:

- Employees who have clocked in and are currently on duty.
- Each person's current working duration.

Correct a missed clock entry

If an employee forgot to clock in or out:

1. Go to **Admin > Timeclock** (or **Timeclock > History**).
2. Find the entry and click **Edit**.
3. Correct the start and/or end time.
4. Save — Kintai automatically recalculates the working duration.

6. Daily Reports

Validate a report submitted by an employee

1. Go to **Store > Daily Reports**.
2. Filter by status "**Submitted**" to see reports awaiting validation.
3. Click a report to check the data (sales, customers, costs, losses, notes).
4. Click **Validate**.
5. Kintai automatically generates a PDF and sends it by email to the recipients configured in store settings.

Create a report yourself

If no employee has entered a report for a given day:

1. Go to **Store > Daily Reports**.
2. Click **+ New Report**.
3. Select the date and fill in the KPIs.
4. Click **Submit**, then **Validate**.

7. Store Statistics

Go to **Store > Statistics** to view, by period:

- Total hours worked by your team.
- Staff cost versus sales.
- Customer footfall trends (from daily reports).

8. Messaging and Notifications

Send a message to the team

1. Go to **Messages**.
2. Click **+ New Message**.
3. Enter a **subject** and add your **recipients** (one or more store members).
4. Write your message and send.
5. Replies arrive in real time, like a chat.

Manage your notifications

The  icon at the top of the interface groups all your alerts (new request, unread message, submitted report). Click **Mark all as read** to clear the notification centre.

Employee Guide (Staff)

This guide is for employees who use Kintai day to day. No technical knowledge is required — just follow the steps.

Other languages: Français | 日本語

1. Logging In

Go to the URL provided by your manager.

- **With your email:** enter your email address and password.
- **With your employee code:** click "Log in with code", then enter your employee code, your store code, and your password.

Forgot your password? Contact your manager — they can reset it from the admin panel.

2. Your Dashboard

This is the first page you see after logging in. To customise it:

1. Click **Customise** (button at the top right).
 2. Enable or disable the widgets you want:
 - **Next shift:** your next scheduled slot.
 - **Monthly stats:** your hours worked this month.
 - **Clock status:** whether you are currently "on duty".
 - **Pending requests:** leave or swap requests awaiting a response.
-

3. Viewing My Schedule

Go to **Planning** to access your shifts. Three views are available:

List View

A table of your upcoming shifts with dates, times, and types. Ideal for planning your week.

Calendar View

A monthly calendar to visualise your full schedule at a glance.

Today View

A focus on your shifts for the current day only.

Syncing my schedule with my calendar (iCal)

To display your Kintai shifts in Google Calendar, iPhone Calendar, or Outlook:

1. Go to **My Profile > Calendar**.
 2. Copy the **iCal link** shown.
 3. In your calendar app, add a "Subscribe to calendar by URL" and paste the link.
 4. Your schedule updates automatically every time a change is made.
-

4. Timeclock

If your store uses the digital timeclock, you will see a **Timeclock** tab in the menu.

Clocking in when you arrive

1. Go to **Timeclock**.
2. Click the **Clock-in** button.
3. Your start time is recorded automatically and a timer starts.

Clocking out when you leave

1. Go to **Timeclock**.
2. Click the **Clock-out** button.
3. Kintai records your end time and calculates your total working duration.

Forgot to clock in or out? Let your manager know as soon as possible — they can correct your times manually.

5. Requesting Leave

1. Go to **Requests > Leave**.
2. Click **+ New Request**.
3. Select the **start date** and **end date** of your absence.

4. Add a **reason** if you wish.
5. Click **Submit**.

Your manager receives a notification. You will be notified of their decision as soon as they process your request.

6. Proposing a Shift Swap

If you cannot cover one of your shifts and want to swap with a colleague:

1. Go to **Requests > Shift Swaps**.
2. Click **+ Propose a Swap**.
3. Select **your shift** that you want to give away.
4. Select the **colleague** you want to swap with.
5. Select the **colleague's shift** that you will take in exchange.
6. Click **Send Proposal**.

Your colleague receives the request. If they accept, the manager receives the final request for approval.

7. Applying for Open Shifts (Bidding)

The bidding list shows available slots that are not yet assigned to anyone:

1. Go to **Planning > Shift Bidding**.
2. Browse the available shifts (date, times, type, manager's note).
3. Click **Apply** on the slot that interests you.
4. Your application is sent to the manager.

If the manager selects you, the shift is automatically assigned to you and you receive a confirmation notification.

8. Messaging

To communicate with your team or manager:

1. Go to **Messages**.
2. Click on an existing thread to reply, or **+ New Message** to start one.
3. Select your **recipients**.

4. Write your message and send.

Replies arrive in real time, like a chat application.

9. My Profile

Go to **My Profile** (icon at the top right or side menu) to manage your personal settings.

Change your password

1. Click **Security**.
2. Enter your current password, then the new one.
3. Confirm and save.

Change the interface language

1. Click **Preferences**.
2. Select **Français**, **English**, or **日本語**.
3. The page reloads in the chosen language.

Enter your weekly availabilities

Tell your manager which days and times you are available to work:

1. Go to **My Profile > Availabilities**.
2. Fill in the weekly grid (Mon–Sun) by clicking on the time slots that suit you.
3. Save. Your manager will see these preferences when building the next schedule.

Customise the side menu

If some menu items are not relevant to you:

1. Go to **My Profile > Navigation Settings**.
2. Uncheck the items you want to hide.
3. Save. The menu will be simplified at your next login.

Frequently Asked Questions (FAQ)

Find answers to the most common questions here.

☒ Login

I am not receiving a password reset email.

Kintai only sends recovery emails if an SMTP server is configured. Contact your manager or administrator — they can reset your password manually from **Admin > Users**.

Can I log in without an email address?

Yes. If your administrator has assigned you an **Employee Code**, use it instead of your email address on the login page (click "Log in with code").

☒ Scheduling and Shifts

How do I sync my schedule with my phone?

1. Log in and go to **My Profile > Calendar**.
2. Copy the **iCal link**.
3. On your phone, add a "Subscribe to calendar by URL" and paste the link. Your schedule updates automatically every time a change is made.

I cannot work a shift — how do I propose a swap?

1. Go to **Requests > Shift Swaps > Propose a Swap**.
 2. Select your shift and the colleague you want to swap with.
 3. Your colleague must accept, then the manager approves.
-

☒☒ Timeclock

I forgot to clock out when I left — what do I do?

Let your manager know as soon as possible. They can correct your end time manually in **Admin > Timeclock**.

Why can't I see the Timeclock tab?

This tab only appears if you are a member of at least one store with the "Staff" or "Manager" role. Ask your administrator to check your store membership.

☒ Reports and Payroll

When will my payslip be available?

Payslips are generated manually by your manager or owner, usually at the end of the month. Your administrator will let you know when they are ready.

☒ Troubleshooting

The application does not display correctly on my phone.

Kintai is optimised for up-to-date Chrome, Safari, and Firefox. Try clearing your browser cache if the problem persists.

I see "squares" instead of some characters in a PDF.

This is a missing font issue on the server for Japanese or special characters. Report it to your system administrator — they can install the required CJK fonts.

Kintai Glossary

Simple definitions of the terms you will encounter in the application.

A

- **Audit Log** : An immutable register that records every action taken in the system (creation, modification, deletion). Accessible to owners only.

B

- **Bidding (Shift Bidding / Open Shifts)** : A space where unassigned shifts are offered to all employees. Anyone can "apply" to work those slots.

C

- **Clock-in / Clock-out** : Timeclock actions. "Clock-in" when you start work, "Clock-out" when you finish.
- **Conflict** : A situation where the same employee is scheduled for two overlapping shifts.

D

- **Daily Report** : Entry of performance data (sales, customers, etc.) made at the end of the day. Follows a cycle: Draft → Submitted → Validated.
- **Dashboard** : Your home page displaying key information as customisable widgets.

I

- **iCal** : A standard format that lets you "subscribe" an external calendar (Google, iPhone, Outlook) to your Kintai schedule, with automatic updates.

M

- **Manager** : A role that allows managing the schedule, requests, and reports for a specific store.
- **Members** : Users attached to a store with a defined role.

O

- **Open Shift** : A shift posted to Bidding — unassigned and available for employees to apply for.
- **Owner** : The global administrator with access to all stores and all system settings.

P

- **Payslip** : A document generated by Kintai summarising hours worked and the calculated wage for a given period.

S

- **Shift** : A working time slot assigned to an employee (e.g. 08:00–16:00 on Tuesday).
- **SSE (Server-Sent Events)** : Technology that delivers messages and notifications in real time without needing to refresh the page.
- **Store** : An independent business unit in Kintai. Each store has its own members, shifts, and reports.

T

- **Timeline** : The schedule view showing horizontal bars per employee per day — the main tool for creating and editing shifts.
- **Timeoff** : Any absence request (holiday, sick leave, etc.) submitted by an employee and approved by a manager.
- **Timeclock** : The tool used to record the actual start and end time of a working session.
- **Toasts** : Small notification bubbles that briefly appear at the bottom of the screen to signal an important action.

Site Map

An overview of all pages available in Kintai, organised by role.

☒ Pages available to all roles

Page	Description
Login	Authentication by email or employee code
Dashboard	Customisable home page with widgets
My Profile	Personal information, language, password
Availabilities	Weekly grid of preferred working hours
Navigation Settings	Customisation of the side menu
Messages	Real-time chat and discussion threads
Notifications	Alert centre and history

☒ Employee Space (Staff)

Page	Description
Planning > List View	Table of upcoming shifts
Planning > Calendar View	Monthly view of the schedule
Planning > Today View	Focus on today's shifts
Planning > Shift Bidding	Browse and apply for open shifts
My Profile > Calendar (iCal)	Sync feed for external calendar apps
Timeclock	Live time recording (Clock-in / Clock-out)
Requests > Leave	History and submission of absence requests
Requests > Shift Swaps	Propose or accept a shift swap

☒☒ Manager Space

Page	Description
Planning > Timeline	Main scheduling tool (Drag & Drop)
Planning > Conflicts	Detection and resolution of overlapping shifts
Planning > Excel Import	Bulk schedule upload

Page	Description
Requests > Shift Bidding	Manage applications for open shifts
Requests > Leave	Approve or refuse absence requests
Requests > Shift Swaps	Approve or refuse proposed swaps
Timeclock > Active	See who is currently at work
Timeclock > History	Correct missed clock entries
Store > Daily Reports	Enter, submit, and validate daily KPIs
Store > Statistics	Performance and profitability charts

Owner Space

Page	Description
Admin > Stores	Create, edit, and delete stores
Admin > Users	Global directory and account management
Admin > Shift Types	Define reusable work categories
Admin > Employee Statistics	Cross-store statistics
Admin > Payslips	Generate HTML and PDF pay statements
Admin > Activity Log	Full system audit trail
Store Settings > SMTP	Email sending configuration
